

Rain Barrel Info for web site 07-14-08

CGC Rain Barrels

The CGC has two rain barrels installed on its facility. One barrel is constructed with a salvaged food (olive) barrel outfitted with an improvised diverter made with standard downspout material. The second is a commercially manufactured rain barrel and diverter purchased from Gardener's Supply Company.

For information on uses for and installation of Rain Barrels please refer to the CGC Rain Barrel Handbook.

Rain Barrel – Do It Yourself with an improvised diverter
